Vega Nilanos

BIOVEGANO

Organic & vegan production

We produce high-quality, healthy vegan products made from organic ingredients that have been cultivated in a special environment, nurtured for generations by farmers who live in symbiosis with the land that provides for them.

BIO

All our products have European organic certification and are produced in a sustainable way.

ECO

We take care of the environment so that our products are totally the healthiest and most sustainable.

VEGAN

In our line of vegan products, we do not use any animal-derived ingredients.

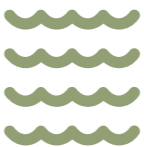

We have recovered the ancestral flavors of the first Mediterranean cuisine and we have highlighted the enormous legacy, properties, and taste of a tradition bathed by the same sea that has given rise to the world's finest products.

Recovering ancestral flavors involves having a high-quality product cultivated with time and care.

ORGANIC PRODUCTS

An organic product is one that is produced using sustainable agricultural and livestock practices that take into account the environment and animal welfare. **We use natural methods to control pests and diseases, we do not apply synthetic fertilizers and pesticides**, and we implement techniques that help preserve biodiversity and soil fertility.

We use water resources with the utmost responsibility

All our crops are organic and certified

We're farmers and producers, we take care of the land

We not only take care of our lands, but also our environment

VEGAN PRODUCTS

Produced through the transformation of suitable raw materials; **they do not contain any ingredients of animal origin** or incorporated during the transformation process.

Vegan products are suitable for consumption by individuals following a vegan diet, which excludes all animal-derived products, including meat, eggs, dairy, honey, among others.

The "European Organic Certification" is a process of control and verification carried out on food products to ensure that they have been produced following the standards for organic agriculture in the European Union. They must meet a series of requirements, such as the absence of synthetic pesticides and fertilizers, the prohibition of the use of genetically modified organisms (GMOs), respect for natural crop cycles, the use of sustainable techniques, and the implementation of practices that promote biodiversity.

Soil, water, and a unique environment. We don't need anything else.

Our products

We produce with the highest **BIO-VEGAN** standards of quality and food safety in the market. We work with a regenerative philosophy, focusing on land sustainability and caring for the environment to achieve a truly ecological product with the best taste.

Pates

Artisanal bio-vegan pates made with natural, organic ingredients. They stand out for their intense flavor, texture, and traditional preparation.

Sauces

Our sauces preserve the essence of Mediterranean cuisine and the traditional flavor to accompany any dish (tofu, potatoes, pasta, chips, etc.).

Creams

Creams that stand out in the market for their high percentage of quality raw materials and quantity.

Other products (COMING SOON ON SALE)

High-quality products exclusively and artisanally selected from local producers and farmers in Chirivel.

CREAMS

Almond Cream

Feel the Mediterranean love in every spoonful of our Almond Cream. The main crop in our territory, with **energizing properties**.

Smooth texture and authentic flavor for your moments of enjoyment!

Chirivel is a benchmark in organic and regenerative agriculture. In addition to representing one of the most biodiverse areas in the world, we harness these values to process raw materials of the highest quality and respect for the ecosystem in an artisanal manner, right at the source.

Our land, Chirivel

Located in the Vélez region, it stands out for its production of organic fruits. For Vegavilanos, being born and raised here is part of the same “natural” feeling that drives us to create our products.

Thanks to the limiting edaphoclimatic conditions, Chirivel is a reference in sustainable agriculture. Local farmers have adopted environmentally friendly farming practices, avoiding the use of pesticides and chemicals, and opting for natural methods to cultivate their products.

In addition to organic nuts, Chirivel boasts a fertile plain located in one of the most unique gallery forests in the Iberian Peninsula.

The production of organic fruits is carried out with a focus on sustainability and quality. Farmers use traditional techniques such as crop rotation and the use of natural fertilizers, ensuring the absence of harmful chemicals. They also comply with internationally recognized rigorous organic certification standards, ensuring food safety and product quality.

The production of organic fruits not only benefits consumers concerned

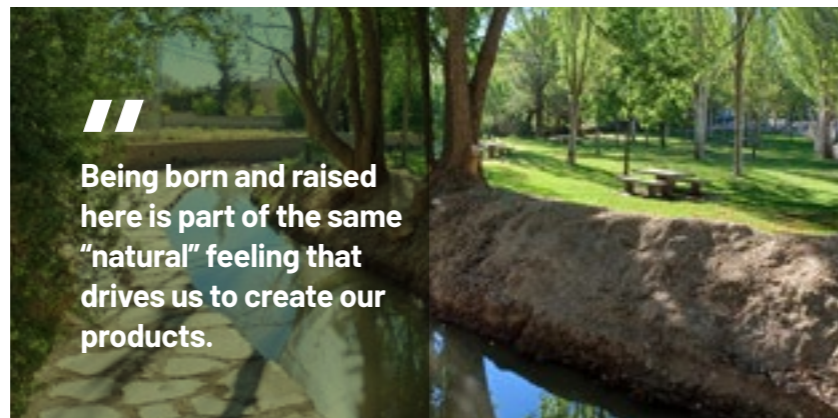

about the quality and origin of food but also the local economy.

The products of Chirivel’s land represent not only its produce but also a sustainable economy that generates wealth for farmers, allowing them to continue a centuries-old tradition and foster a unique community.

Job creation in the community and the promotion of sustainable

development are pillars of Vegavilanos.

Local farmers and producers are an integral part of life in Chirivel, contributing to the growth and prosperity of the region.

Being born and raised here is part of the same “natural” feeling that drives us to create our products.

We strive to take care of our environment and create a productive, sustainable ecosystem for both our land and those of us dedicated to bringing out the best from it.
